ProdoVite® - An absolute one-of-a-kind liquid multi-nutrient complex

Proprietary exclusive Prodosome® (SK713 SLP) nutrient encapsulation technology promotes unprecedented rapidly absorbed “Nutrition That Gets In®”. Scientific research shows that the SK713 SLP technology promotes nutrient absorption of a proprietary VMP3 multinutrient complex in 5 minutes or less 100% of the time in 100% of the subjects tested. The Prodosome technology does not rely on the competence of compromised digestive systems to achieve absorption.”

1. **Great ingredients:** “premium quality, patented, trademarked, proprietary, branded and science-based ingredients”. All produced in the USA.

2. **Absorption capabilities:** Nutrient absorption begins in the mouth, more nutrients reach the small intestine intact and are spread over a larger surface area for more thorough uniform absorption resulting in greater health benefits.

3. **Mechanical predigestion process:** Super advanced “chewing” through wet milling (high-shear, tri-blender jet compression particle processing - a mechanical predigestion technology) helps improve solubility and enhances Prodosome® technology!

4. **Prodosome® technology:** Exclusive customized proprietary exclusive technology that uses enhanced phospholipids spheres to encapsulate and deliver a range of synergistic nutrients into the blood at the same time so they all work together creating real energy.

5. **EFfluence® technology:** a natural proprietary solar-evaporated trace mineral complex from a natural source is mixed into the phospholipids to imprint a higher energy frequency into the Prodosomes and dramatically increase the beneficial effects of ProdoVite®’s health enhancing nutritional payload.

WADA

ProdoVite® has been tested and cleared for a wide range of substances banned by WADA (World Anti-Doping Agency). LGC (formerly HFL Sport Science) is a World Class doping control laboratory with over 50 years of experience in drug surveillance in sport. ProdoVite® passed the test for not containing any of the substances that appear on the WADA prohibited list as well as lists from the NFL, NBA, NCAA, MLB and NL.
